Professional Summary

With a little over a year of working experience, I have developed and built my skills not only in web development but also a little in networking, as well as in communicating and relating with others. I keep myself constantly open to learning, growing and new challenges. I have had the privilege of working independently and would love to bring my problem-solving, amongst many other skills to working in a team and providing help and assistance to customers/end-users.

Skills & Certifications

Languages: JavaScript | Python
Frameworks: NodeJS | Python Flask | SQL | NoSQL

Work History

Hoop Telecoms
Lagos, Nigeria
Jul. 2022 – May 2023

Full Stack Web Developer (Intern - NYSC)
Singlehandedly developed and maintained customer information management system
Accomplishments:
● Centralize customer info management; I integrated numerous customer data from across different spreadsheets used by different teams and departments to create a central system for managing customer data, improving customer service, and collaboration between different teams and departments.
● Appropriate access management to customer information; I utilized RBAC (Role Based Access Control) to give and restrict access to certain customer data based on employee's role and responsibilities, thereby boosting security and integrity over customer data.
● Centralizing access to core organizational data; as well as integrating customer data, I also integrated company data from different spreadsheets into this system reducing administrative cost as well as improving quality of work.
Tools used: Python Flask **|** REST API **|** SQL **|** HTML **|** CSS **|** JavaScript **|** Git.

Notable Projects

YelpCamp
Aug. 2023 – Nov. 2023
This project was done alongside the course instructor while learning NodeJs with Express.
- Implemented basic CRUD.
- Implemented tests with Postman.
- Implemented RBAC.

Tools used: NodeJS **|** Postman **|** NoSQL **|** Git
